Certification

Ducat

Software Development Engineer

Noida,

01/2024 - 2025

Software Development (Tech: JAVA, Spring boot Framework, MySQL, GIT)

- Java Full Stack Development Certification
- Gained practical experience in **Java Full Stack Development** using:
- **Backend:** Core Java, JDBC, Servlet, JSP, Spring Boot, Hibernate, Spring Security, Microservices, MySQL, Oracle, MongoDB
- **Frontend:** HTML5, CSS3, JavaScript, React.js
- Developed a solid foundation in full stack development using **Java and React**.
- Capable of designing, developing, and deploying scalable, secure, and maintainable applications
- Worked on project modules including **CRUD operations, user authentication, and API integration**
- I am confident and ready to contribute to a dynamic team as a **Java Backend Developer** or a **Full Stack Developer**, where I can apply my skills to build secure, scalable, and user-centric software solutions.

Projects

Blogging Application

Noida, India

Tech Stack: Java, Spring Boot, MySQL, Spring Security, JWT

- The **Blogging Application** is a full-stack web application that allows users to **create, read, update, and delete (CRUD)** blog posts. It features **user authentication, role-based access control, comment functionality**, and secure **RESTful API** integration.
- The backend is developed using **Java (Spring Boot)**, and data is managed using a **MySQL** relational database. The project follows **modern software architecture principles**, such as layered architecture (Controller → Service → Repository), and adheres to **clean code practices** for maintainability and scalability.
- Session and token-based authentication (JWT), API security with Spring Security, Data persistence with JPA and Hibernate, Responsive UI integration (if frontend used), Modular, reusable, and maintainable code structure
- **Java + Spring Boot** offers scalability, security, and robustness for enterprise-grade apps.
- **JWT + Spring Security** provide a secure and standard approach for user authentication.
- On success, you'll receive a JSON response with blog post details.

Portfolio Register and Edit functionality

Delhi

Tech Used: JSP, Servlets, Java Beans, JDBC, MySQL, Tomcat

- This is a **Java-based web application** that handles **user authentication** using **JSP, Servlets, and MySQL**. The application allows users to:
- **Register:** Users fill a form and their data is saved into the MySQL database via JDBC.
- **Login:** Validates email and password; creates a session on success.
- **Edit Profile:** Users can update their name and email using a form.
- **Logout:** Destroys the session and redirects to the login page.

Skills

Programming Languages: C++ • python • Java • JavaScript

Frameworks: • Spring Core. • Spring Boot • Spring MVC • Spring Data JPA • Spring Security • Spring REST

Databases: • MySQL • PostgreSQL • MongoDB • Oracle

Version Control : • GIT • GITHUB • DOCKER

Education

Indira Gandhi National Open University

Bachelor of Computer Applications (BCA) (Ongoing)

2025 - 2027

Government Polytechnic (UBTER)

Diploma in Information Technology

2021 - 2024
